

XM radio and its Instant Weather & Traffic provides a service to me that no other media can offer. I believe that I should not be denied services that I pay for. No person or organization, including the National Association of Broadcasters, should dictate what I can listen to, or what can be broadcast over satellite radio. I urge you to REJECT NAB's Petition 04-160 and to support XM radios ability to provide its listeners the service they use and pay for. Thank you.
